### MSc programs in neuroscience at the University of Tübingen

July 2008

Dear sir, dear madam,

during the past 10 years, the Graduate Training Centre of Neuroscience at the Eberhard Karls University Tübingen has established itself as one of the leading German institutions offering English taught MSc and PhD programs in neuroscience.

For the winter term 2009 / 2010, we are looking for outstanding international graduates (BSc) in neurosciences, biology and molecular biology, biotechnology, biochemistry, biomedicine, biophysics, psychology, information technology, cognitive sciences and related disciplines to offer them insights into state-of-the-art research in neurosciences and to complete their MSc and, eventually, their doctorate in

- Neural & Behavioural Sciences
- Cellular & Molecular Neuroscience

at the Graduate Training Centre of Neuroscience.

Please find enclosed information about our MSc programs in neuroscience. We would appreciate if you could post up our promotion material and make it available to potential candidates.

With best regards,  
yours sincerely,

Prof. Dr. H. Herbert
