Objectives of the conference:

The 21st century women have stepped into a new era of awareness, independence and social responsibilities. There is need to initiate a movement towards women empowerment. Gender equality and women empowerment is the 3rd Millennium Development Goal expected to embark upon giving women their share in society and access to use of new technologies. Therefore, women's role in national development and use of new technologies is extremely important.

Now at the beginning of the 21st century with the state of the world as it is, it is a crucial time for women to come together to make a difference. This conference, the first of its kind, is organized to bring all the stake holders together to discuss how to foster women's contribution to Engineering, Technology, Science, Management, Humanities and all other relevant fields.

The present conference is planned with a view to discuss various issues related to women & their role in Science & Technology in a view to create sustainable career. This international conference will provide a unique platform for the development of all stakeholders, by providing them opportunities to contribute towards the betterment of the economy & society. This International Conference will help to share and exchange ideas, identify and discuss options for overall development of women. With the overall development of women, the development of society is possible.
